- Achilles Tendonitis and Tendinosis
- Plantar fasciitis
- Osteoarthritis

HIP

- Ligament and muscle sprains / tears
- Tendonitis and tendinosis
- Trochanteric bursitis
- Osteoarthritis

REIMBURSEMENT & INSURANCE

WILL MY INSURANCE COVER THIS PROCEDURE?

While PRP has been used for decades, often in professional athletes who are looking to avoid surgery or prolonged recovery periods, its application in the treatment of pain is relatively new. Because of this, insurance companies do not currently cover PRP therapy.

HOW MUCH DOES IT COST?

The cost of PRP treatment varies depending on the procedure performed. Our office staff can assist you with payment options and any other questions you may have.

PLATELET RICH PLASMA (PRP) THERAPY

Platelet Rich Plasma (PRP) Therapy is a revolutionary new treatment that promotes healing without surgery.

Many people think all PRP is the same, but this is simply not true. At Orthopedic Care Physician Network (OCPN) our board certified physicians have years of experience with PRP, and are dedicated to keeping up with the latest developments in the field of regenerative medicine.

Three Ways PRP Therapy is Different at OCPN

- We use the most advanced centrifuge systems to ensure the highest concentration of platelets.
- We use ultrasound guidance to ensure the PRP is injected into the area of injury.
- OCPN has developed an evidence based standardized post-injection protocol to give our patients the best chance at recovery.
